Response under 35 U.S.C. § 121

This is in response to Office communication (paper no. 8) concerning the above-referenced application mailed 8/13/2003. The communication stated:

"The reply filed on 5/12/03 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): A single ultimate disclosed specie was not elected for the first and second oligomers. Each oligomer is defined by the end groups E1 and E2 in addition to the oligomeric units present. Therefore, single ultimate disclosed species also require identification of the end groups present, whereas applicant has only identified the repeating monomeric units."

Applicants hereby identify and elect the end groups to be:

E1 = H; and

E2 = H.
